## PROJECT & PORTFOLIO MANAGEMENT SOLUTION

### OVERVIEW

As proud Gold Project & Portfolio Management Microsoft partners, we implement Project & Portfolio (PPM)/Enterprise Project Management (EPM) systems with utmost efficiency and precision.

More specifically, we conduct the following main activities:

- > Install the desired Microsoft Project & Portfolio Management products (PPM/EPM);
- > Automate the existing clients' processes through workflows and entry forms;
- > Customize PPM/EPM solutions according to customers' needs, including user-friendly designs, fields, enterprise project types, project sites, security rules, documents repository, calendar and KPIs;
- > Facilitate project tracking within a specified time, budget and resources; and
- > Save time and effort for project managers, system users, top management for project updates, monitoring and decision-making through customized PowerBI dashboards.

Our subject matter experts have in-depth experience and the required technical skills to use the latest technology from Microsoft and apply world-class best practices in project management.

### VALUE PROPOSITIONS

- > Accessible anytime anywhere using Single Sign-On
- > Efficient management of project resources
- > Compilation of project processes (Corporate governance)
- > Transparency for all projects
- > Centralized project site
- > Development of dashboard and reports

## CUSTOMIZED SOLUTIONS

### INTRODUCTION

Today's society is dominated by the growing use of modern information and communication technologies across all industries, areas and functions. E-services are increasingly being developed to offer efficient access to services in an electronic fashion. Thus, in this digital age, software development and automation have become essential success factors for all businesses and organizations.

### OFFERING

Transition Tech offers the capability to implement e-services tailored to the needs of clients and their enterprise and to meet different demands for technology as they arise. The company's experienced professionals have the necessary skills and readiness to conduct the targeted customization and implementation – be it for e-services and/or software development.

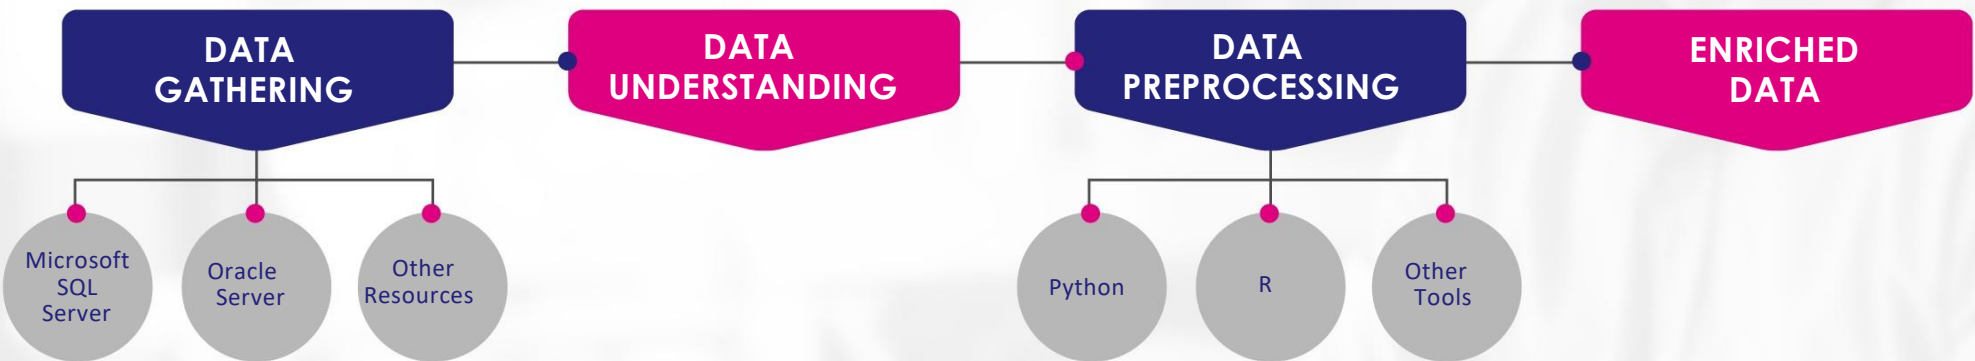

Transition Tech focuses on the importance of applying standard Software Development Life Cycle (SDLC) to deliver high quality products on time, within the budget and according to customers' real needs. Moreover, when it comes to software development, the innovators at Transition Tech address all client's requirements and accordingly analyze, design, develop and implement a solution that is most fitting and valuable to them.

### VALUE PROPOSITIONS

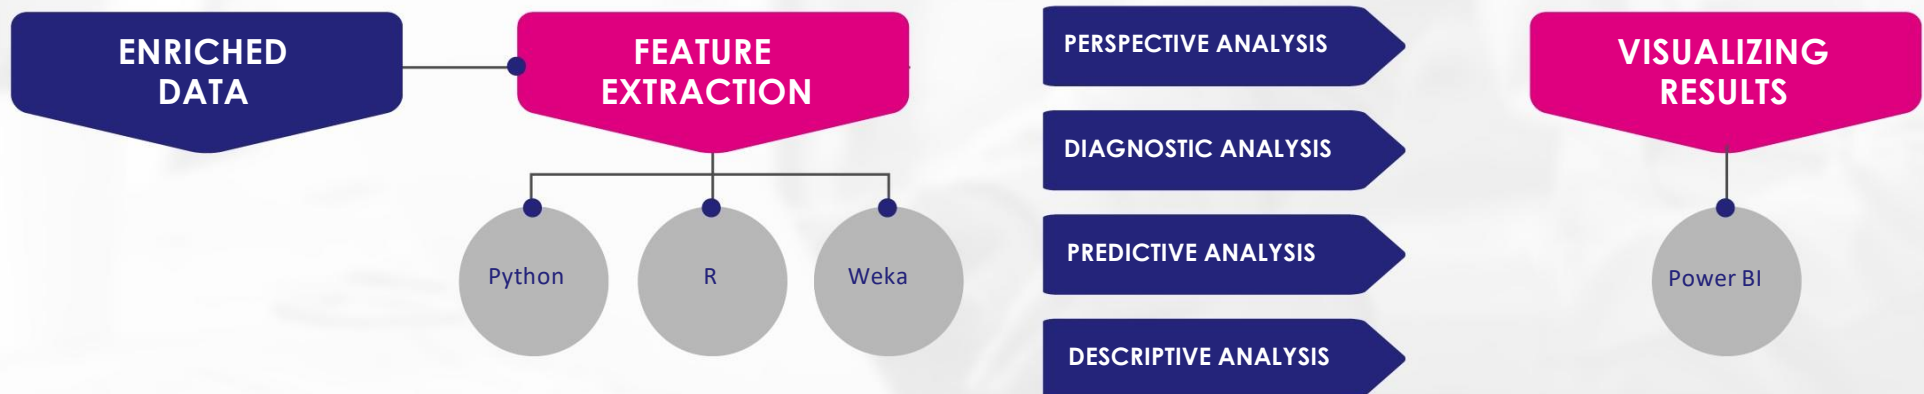

- > Custom solutions for enterprises
- > Time-efficient delivery of solutions
- > Using the latest high technology
- > Practical cost-effective solutions
- > Certified experts
- > Highly qualified resources

# BI APPROACH

## PHASE 1: Data Preprocessing and manipulation

## PHASE 2: Data Analytics and Visualization

# OUR PRODUCTS

# TRANSITION TECH PRODUCTS

## STRATEGY MANAGEMENT SYSTEM

A strategy management tool to manage and monitor your strategies through related projects

## RESEARCH MANAGEMENT SYSTEM

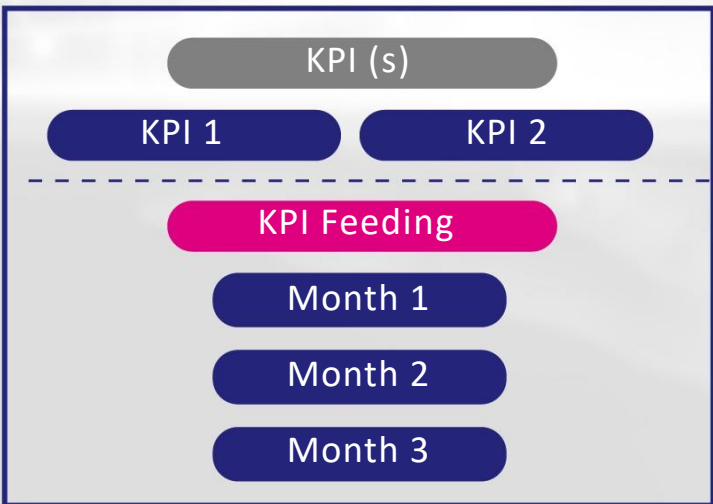

Transition Tech has built from scratch its own module exclusively for the use of research branches in academic and educational institutions. Through customized solutions, interested faculty members may apply for a fund for their research projects by uploading their research proposals and scientific profiles.

## MEDICAL RECORDS TRACKING & ANALYSIS SYSTEM

a computerized system designed and programmed to deal with day to day operations that take a place within the hospitals and medical centers

# STRATEGY MANAGEMENT CAPABILITIES

## STRATEGY MANAGEMENT SOLUTION

### INTRODUCTION

In today's ever-changing times in business, it is crucial for companies to execute organizational strategies that are flexible and practical. The use of a software solution that offers strategic and tactical reporting alongside evaluation and monitoring of real-time operational performance is equally important for an organization.

### OFFERING

At Transition Tech, we help shape optimal corporate strategies at an individual and enterprise level. More specifically, Transition Tech boasts the capabilities to build a strategy management tool on top of the Microsoft PPM/EPM as integrated software. The central objective of this solution is to manage and monitor clients' strategies using pre-defined vision, mission, strategic goals and KPIs.

We can further create a customized Power BI dashboard based on clients' requirements, e.g. risks, issues, KPIs, strategy overview, etc. In addition, this tool connects strategic initiatives with projects according to pre-determined time and cost specifications

### VALUE PROPOSITIONS

- > Strategy management
- > Performance management
- > Monitoring transformation framework
- > Powerful customized KPI engine
- > KPI-derived governance
- > Initiative center
- > Objective and initiative scheduled management

# RESEARCH MANAGEMENT SYSTEM

## RESEARCH MANAGEMENT SOLUTION

### INTRODUCTION

Academic institutions are increasingly turning to research management technology to gain a data-driven edge in this highly competitive industry. With the tremendous growth of higher education, universities are under pressure not only to attract students, professors and funds but also to boost the overall quality of their research. Technology can facilitate and centralize the collection, organization and overall management of the multiple data sources produced by research institutions.

### OFFERING

Transition Tech has built from scratch its own module exclusively for the use of research branches in academic and educational institutions. Through customized solutions, interested faculty members may apply for a fund for their research projects by uploading their research proposals and scientific profiles.

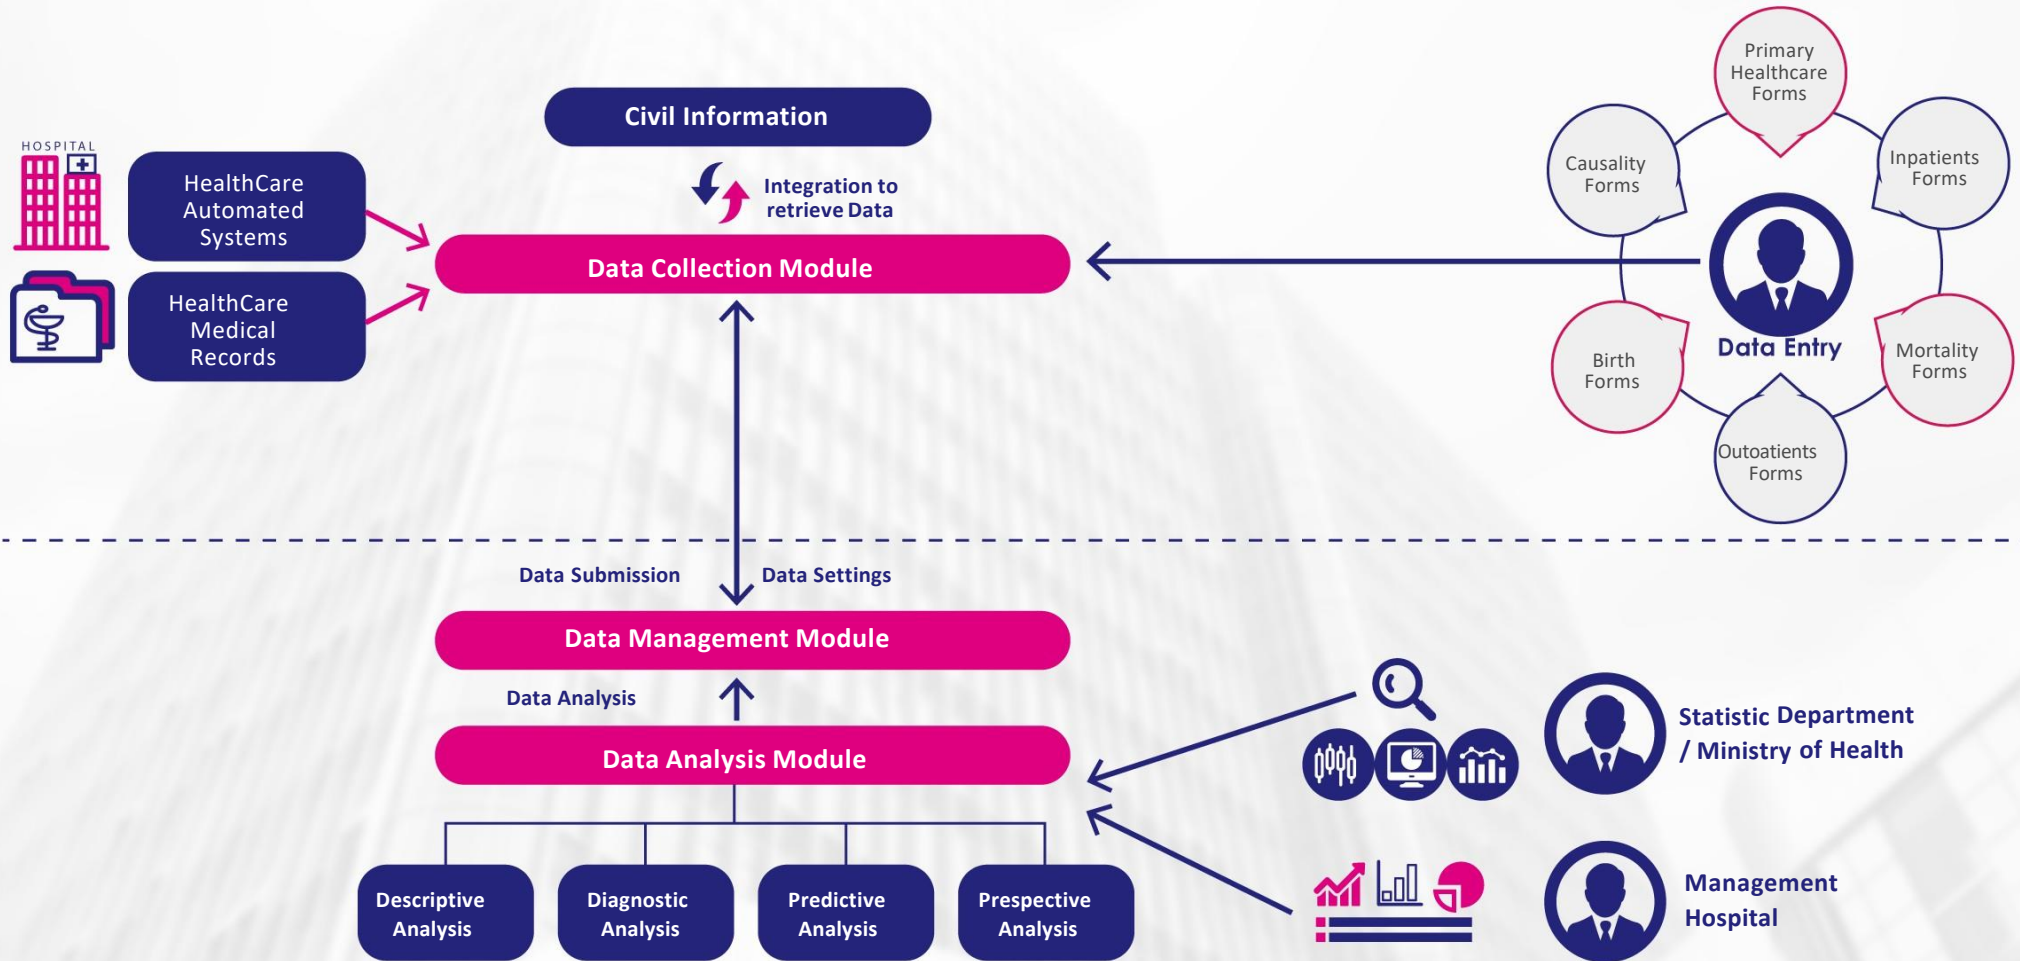

The related university or educational facility will then manage and follow up on research projects' lifecycle from submission to the publication stage through an automated process that facilitates the interaction between the researcher, referee, deanship and research institutes. We further provide the relevant stakeholders the capacity to monitor progress through our intelligence dashboards.

### VALUE PROPOSITIONS

- > E-forms and paperless submission cycle
- > Provision of secure referee system
- > Track research project process
- > Track research publication based on ISI

# MEDICAL RECORDS TRACKING & ANALYSIS SYSTEM

## MEDICAL RECORDS TRACKING & ANALYSIS SYSTEM

### INTRODUCTION

Most of the hospital and medical centers are currently being handled in the traditional way of the collection of patient's information, diagnosis details, etc. Due to the population expansion and the urgent need to have accurate historical records and spontaneous statistics, Medical sector needs to keep in line with the continuous technological development by using computerized medical records system with user friendly, simple, and fast approach. Which will ease handling day to day work with the highest accuracy.

### OFFERING

As one of Transition tech initiatives a Medical Records Tracking & Analysis System is computerized, designed and programmed to deal with day-to-day operations that take a place within the hospitals and medical centers. The system can look after inpatients registration, outpatients discharging, records manipulation, database analysis, diseases entry and diagnoses as per World Health Organization "WHO" standards by compliance to the ICD11 coding schema, powerful analysis screens, statistical reporting, medical cases predictive analysis. It also maintains hospital and medical center information such as Area, region, wards, beds availability, doctors in charge and department administering. Due to the current pandemic or COVID-19 we armed the system with additional module that will allow hospitals and medical centers to start recording, tracking and analyzing COVID-19 statistics for the hospital itself and across the entire country.

### VALUE PROPOSITIONS

- > Automated health records procedures management and processes
- > Spontaneous Statistics.
- > Predictive analysis Reports.
- > Visual interactive Dashboards.
